Instant Fog Protection

The latest innovation in the active asset and staff protection market.

Types of Applications

- Commercial environments to protect assets. Jewellers / Bike shops / Petrol stations / Agricultural machinery / Supermarkets/ Warehouses etc
- Residential – High value garaged content, panic rooms, high value personal goods
- People protection – Lone working environments, high risk counter protection

Density UNIK

The Density UNIK runs off bespoke batteries and is ideal for specific applications where a 240V mains supply is not readily available.

Density Basic

A new entry level fog generator for home and shop targets. It is a fog system with a small size and high performance. Fast and dense, this fog generator produces 390m³ in 50 seconds.

Density 600

The Density 600 is small and powerful. It was developed to protect small to medium size areas such as newsagents and high value goods areas up to 600 m³.

Density 900

Developed to protect in seconds safe rooms, ATM walls, tabacco shops, high value goods reserves up to 900 m³ in 29 seconds.

Density 2400

Powerful and fast, it is made for premises with high risks, large business premises and shops. Fast and dense, this fog generator produces 2400m³ in 80 seconds.
